Technical Details, “Al Tacho” Show by CircoEguap

Freestanding four-point gantry, manufactured and certified by Hisseo company.

Space required for the structure: 8 m x 8 m

Structure height: 6 m

The structure is entirely freestanding, with no anchor points.

The floor must be smooth and solid, preferably flat.

Assembly and disassembly:

- Four people are required for assembly.
- A vehicle must be driven to the assembly site for unloading and loading the components.
- The estimated assembly time is two and a half to three hours.
- Disassembly can be completed in one hour with the help of the staff who assisted with assembly.
